

# New Camlocks now available!

weather resistant • dial combination • mailbox

## Weather Resistant

- 5/8" or 7/8" diecast camlock, keyed alike or different
- Used for any outdoor application requiring resistance to water intrusion, salt, and exposure to freezing temperatures.
- Stainless steel dust shutter and internal o-ring prevents water penetration through the lock. Includes rubber gasket to provide water-tight seal under head of lock allowing no moisture to enter enclosure.
- Long lasting Chrome over double Nickel finish with Stainless steel capped lock head and face for superior weather resistance.
- 90°/180°, clockwise/counter-clockwise cam rotation options.
- Supplied with selection of three cams, two stop plates, mounting nut, trim washer, rubber gasket and cam screw. Includes two rung keys.

## Dial Combination

- Secure with 1,000 Possible Combinations
- Durable All-metal Construction
- Easy to Use & Recombine
- Zinc alloy diecast
- Bright chrome plated standard

## Mailbox - Interior & Exterior

- Nut or clip mounted
- 90° counter-clock-wise cam turn to open
- Key removable in locked position only
- Supplied with selection of five cams, two keys, mounting nut, mounting clip, lock washer and cam screw
