

# It's Not Just A Padlock, It's A Keyless Security System.

## You Set The Combination

1. Open padlock by rotating numbered wheels to current 4-digit combination and depressing shackle.
2. Fully insert combination change pin into shackle opening.
3. Rotate numbered wheels to your NEW 4-digit combination.
4. Remove change pin.
5. Your Sesamee

Keyless Padlock is now set to operate with your NEW 4-digit combination. To lock padlock, simply rotate one or more of the numbered wheels and depress shackle.

**The Sesamee Keyless Padlock features up to 10,000 possible combinations.**

The Sesamee Keyless Padlock keeps total security control where it belongs – in your hands. The unique feature of the Sesamee Keyless Padlock allows you to set the combination. Now, you can inexpensively customize and maintain your complete security system without keys to carry, lose, or break.

- Set several padlocks to open with the same combination or set a different combination for each padlock.
- Change combinations as often as you like.
- Master key your system with serial numbered Sesamee Keyless Padlocks and a register of combinations maintained by your Authorized Security Personnel.

Sesamee Keyless Padlocks are built for maximum security and feature a lifetime guarantee. The solid brass bodies and all brass internal mechanisms provide non-corrosive operation. Padlocks are available with chrome plated hardened steel or solid brass shackles with 1" or 2 1/4" clearances.
