AS INDUSTRIAL AND COMMERCIAL BUSINESSES CONTINUE EFFORTS TO CUT COSTS, SESAMEE® PORTABLE SECURITY PADLOCKS INTRODUCES NEW LINE OF SFIC & KIK HIDDEN SHACKLE SOLID STEEL PADLOCKS.

Puck padlocks have been used for many years and now Sesamee®, which has led the world in innovation and flexibility, introduces the first SFIC and KIK Hidden Shackle Solid Steel Padlock Series to fit Standard Hasps.

July 2013, Wheeling, Illinois—Sesamee® Hidden Shackle padlocks offer the greatest security and fit for real world applications. They are virtually indestructible, with molybdenum alloy steel bodies that resist cutting, sawing and corrosion and hardened boron alloy steel shackles that offer superior cut resistance.

The **Sesamee®** 930SFIC & 930KIK series is made from Solid Steel that has been hardened. Our SFIC Design accepts 6 or 7 pin cylinders from all the leading manufacturers and our KIK Design is prepped for Schlage KIK cylinders. The biggest feature of all is that they fit standard Hasps in the industry. They're ideal for securing security gates, sheds, truck and van doors, industrial machinery and construction equipment.

Features and Benefits of the Sesamee® 930SFIC & KIK series

- Molybdenum Alloy Shackle - Extra protection against cutting
- Lock body conceals shackle - defeats attempts to pry and cut.
- Solid steel body - Added resistance to corrosion
- 2-7/8" diameter to fit standard hasp
