CCL SECURITY PRODUCTS® INTRODUCES THE SESAMEE® 450 WEATHER COVERED LAMINATED SERIES

There are 7 colors in the 450 Series which will assist to improve security identification efforts.

March 11, 2015, Wheeling, Illinois—To help customers with security identification efforts for different work site locations, departments and employee identification, CCL Security Products® has introduced seven colors for its durable 450 Sesamee® Series Weather Covered Laminated padlock. The 450 line includes the following colors in the product roster: Black, Red, Green, Yellow, Blue, Orange and Silver.

“They are a great choice for customers that want to use color for identification and at a lower price,” said Jerry Burhans, CCL Security Products® Sales and Marketing Manager. “Color is universally understood and serves as a great alternative to using engraving or labeling where different language situations may be present.”

This padlock series includes a unique sliding bottom plate to protect the keyway, alloy shackle with PVC cover, 4 pins in the M1 keyway, dual ball locking mechanism, and an anti-bumping, anti-picking, anti-drilling cylinder. The 450 Series padlock’s weather covering is designed to protect the lock from the elements such as water, ice, dirt and grime, so it can be used in manufacturing environments, storefront and business gates, and even on truck doors. The Sesamee® 450 Weather Covered Laminated Series is available carded or in box pack. They are sold in a Shelf Pack of 6 or Master Carton of 36.
